

CRS 25

DEFIES CONVENTION

CRS 25 defies convention as a roofing profile and wall cladding and is far from ordinary. Its robust mechanical locking seams are precision-engineered to safeguard your roof or wall against the elements, ensuring a haven of security and dryness.

CRS 25

We offer this versatile profile in:

- 24 ga, pre-painted steel*
- 16, 18 & 20 oz. copper
- 0.7 mm, 0.8 mm, 1.0 mm pure zinc

*colours available upon request

CRS 25

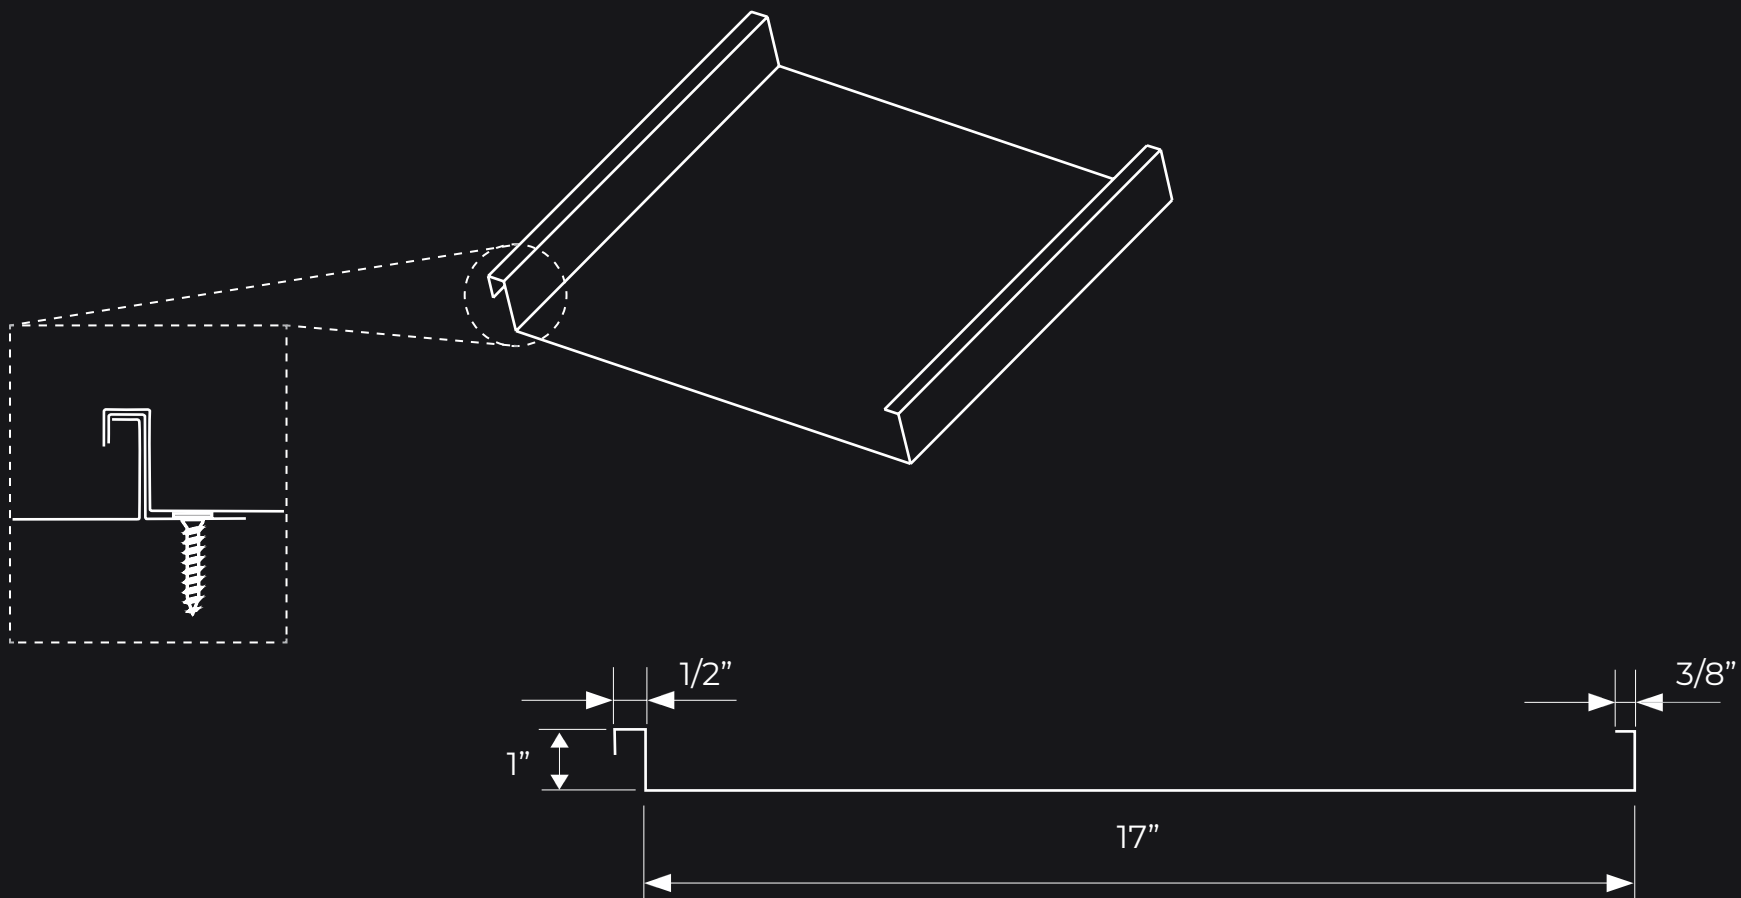

CRS 25

STREAMLINED & ELEGANT

Expertly crafted to endure harsh weather conditions from fierce winds to icy chills, heavy snow, relentless sunshine and torrential rain, CRS 25 ensures your roof's longevity without compromising on aesthetics. With its streamlined, low-profile seams, it imparts an elegant elevation to your roofing, making it a top choice amongst architects, designers, contractors and homeowners alike. This is where form meets function in perfect harmony.
